

# THE FIRST BLOCKCHAIN PLATFORM FOR ADULTS

## HOW TO PARTICIPATE IN STASYQ ICO

### Step 0 - Ether (ETH) purchase

In order to participate in StasyQ Token sale you will need to have Ether (ETH). You can purchase ETH with your Visa or Master card by using such services as:

Indacoin: [https://indacoin.com/en\\_GB/change/buy-ethereum-with-cardusd](https://indacoin.com/en_GB/change/buy-ethereum-with-cardusd)

Changelly: <https://changelly.com/>

Cex.io: <https://cex.io/>

Coinbase <https://www.coinbase.com/>

Some of these service providers are more expensive than others, please conduct your own research regarding where to purchase Ethereum at the best rate.

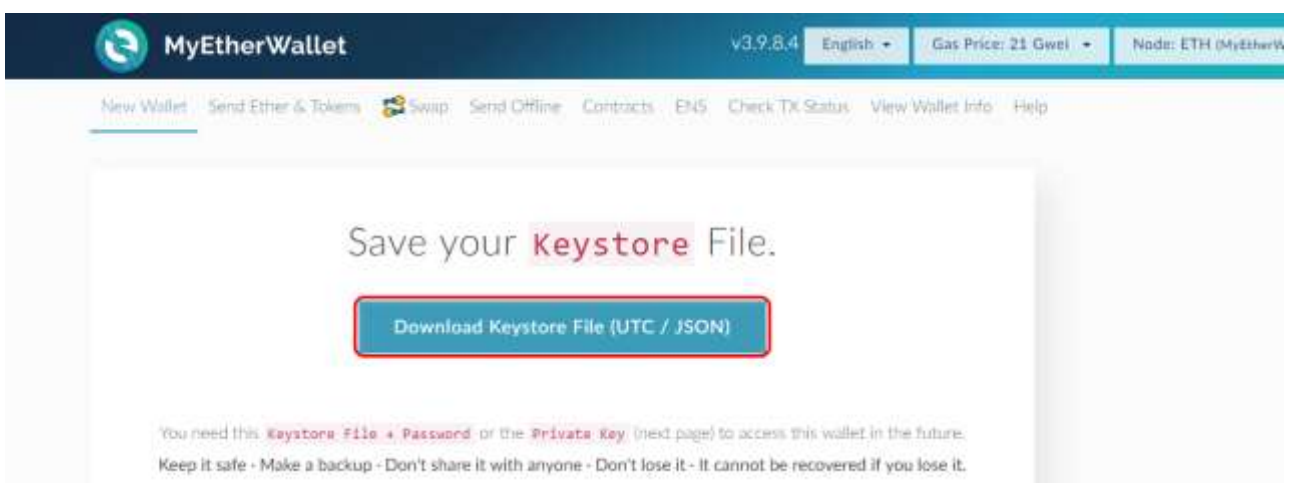

As soon as you purchased Ether – you will need to create a wallet. We recommend using MyEtherwallet, which is reliable and easy to use. Please find instructions below.

### Step 1 – Create Ether Wallet

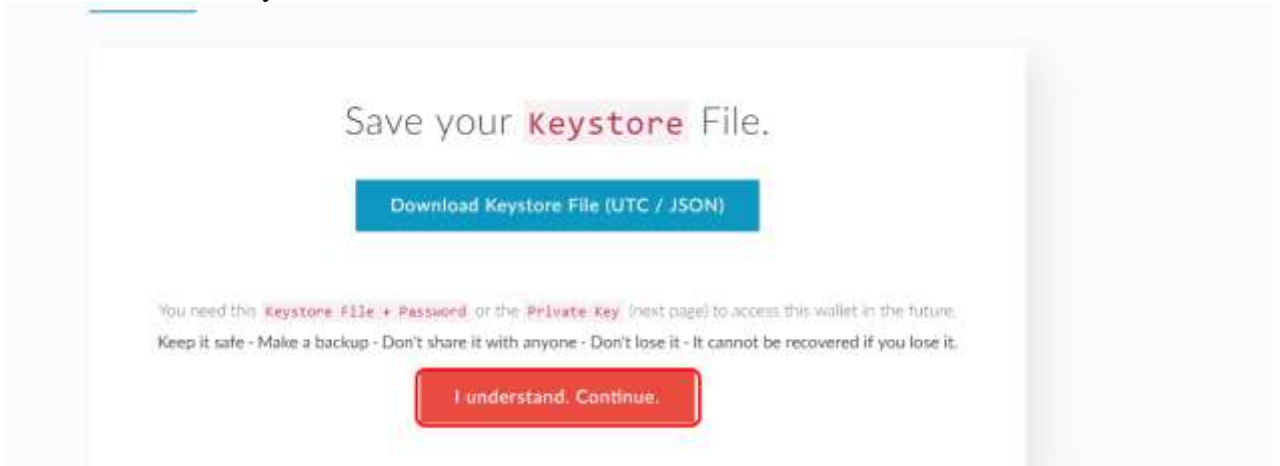

1. Go to <https://myetherwallet.com/>
2. Enter a strong password and click "Create new wallet"

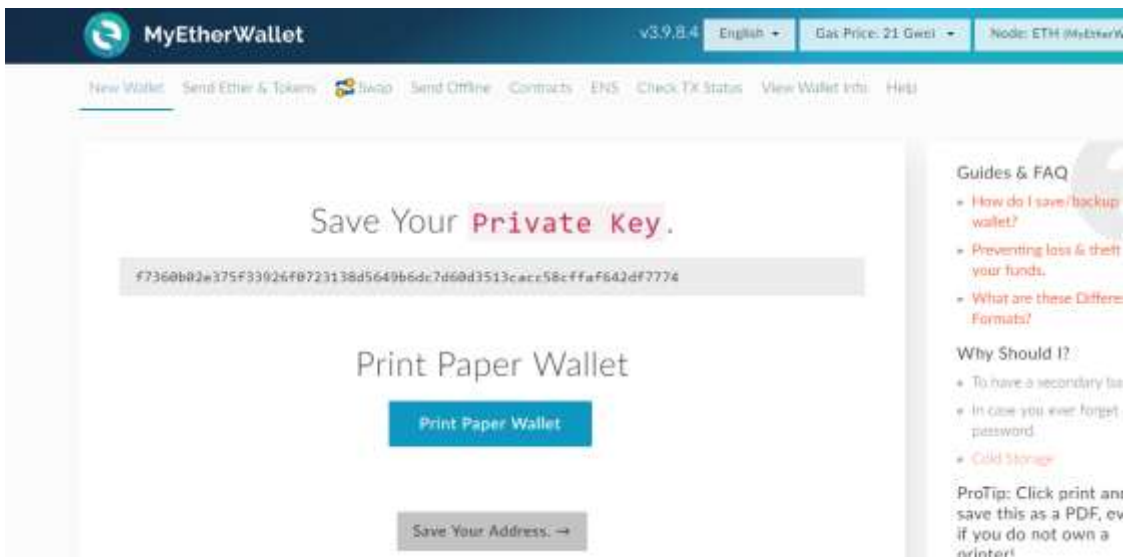

3. **Store your Private Key. Click "Download Keystore File (UTC/JSON)"**

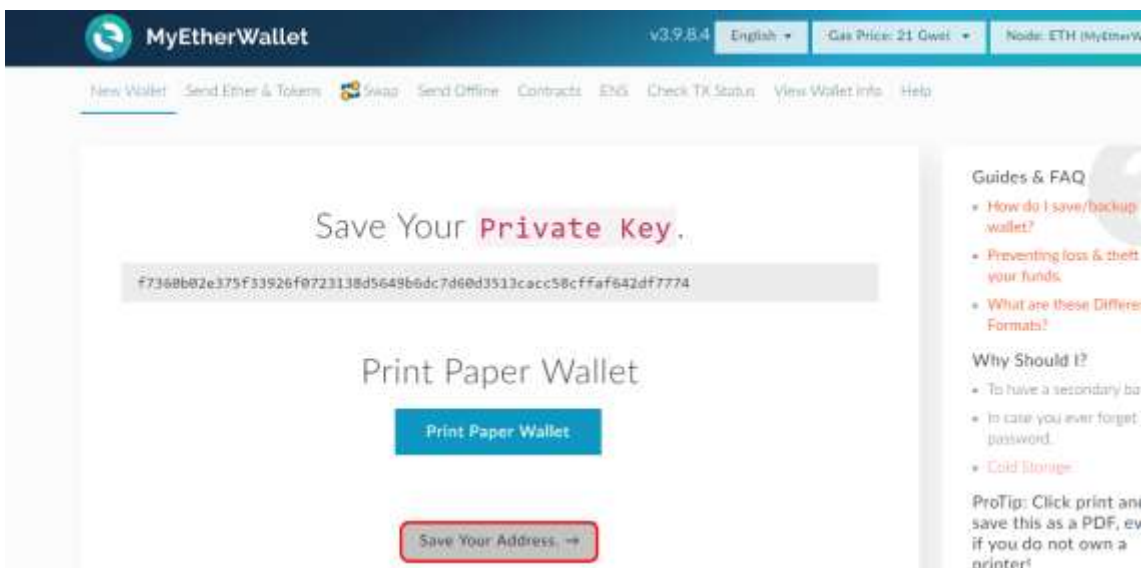

4. Once the Keystore File has been downloaded, click "I understand. Continue."

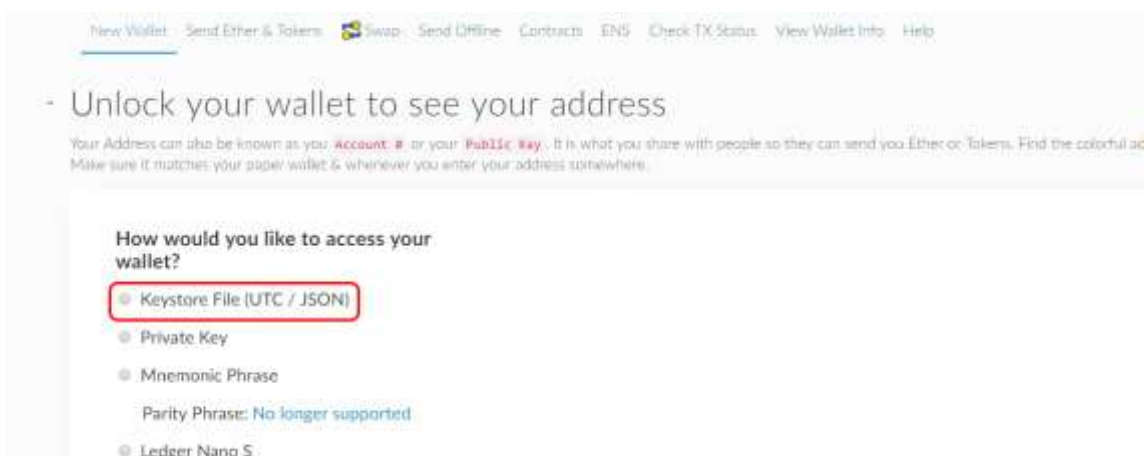

5. You can also save or write down your private key

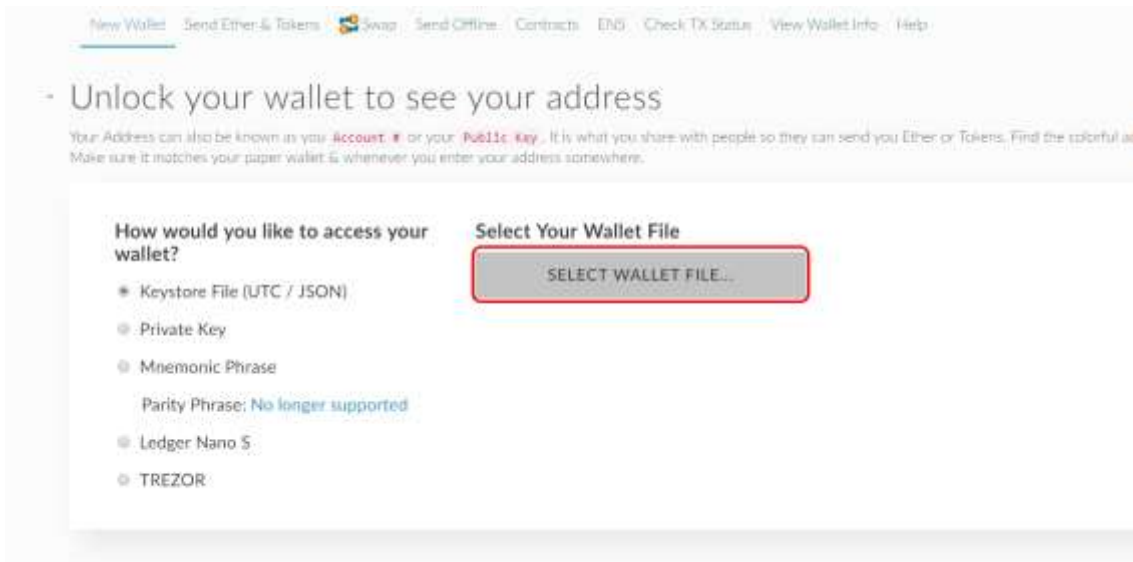

6. Click "Save your address"

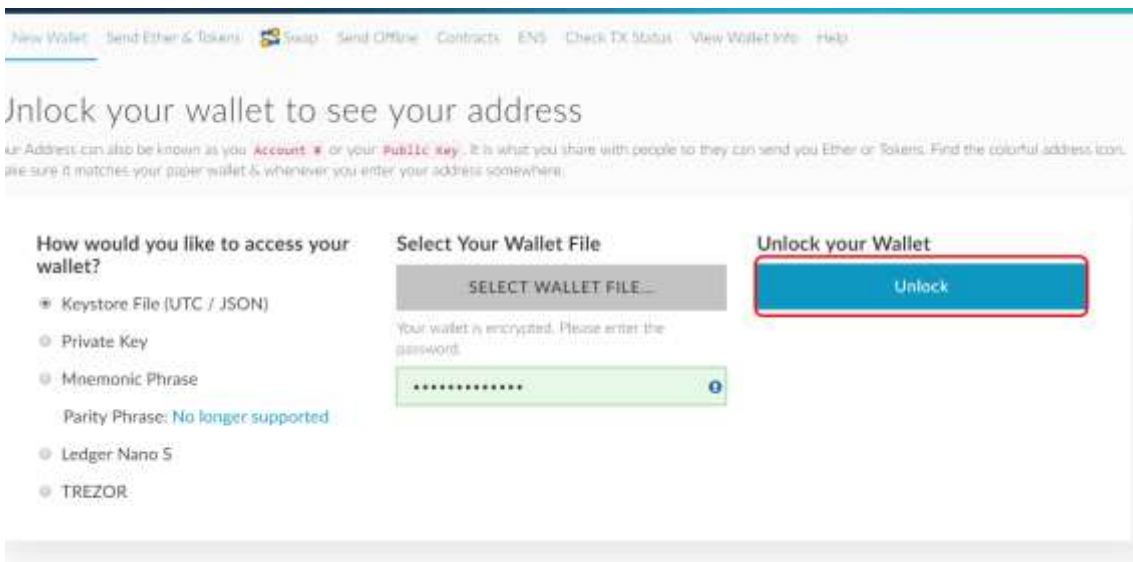

7. Now, to see your address, upload your private key.  
To do so, click "**Keystore File (UTC / JSON)**"

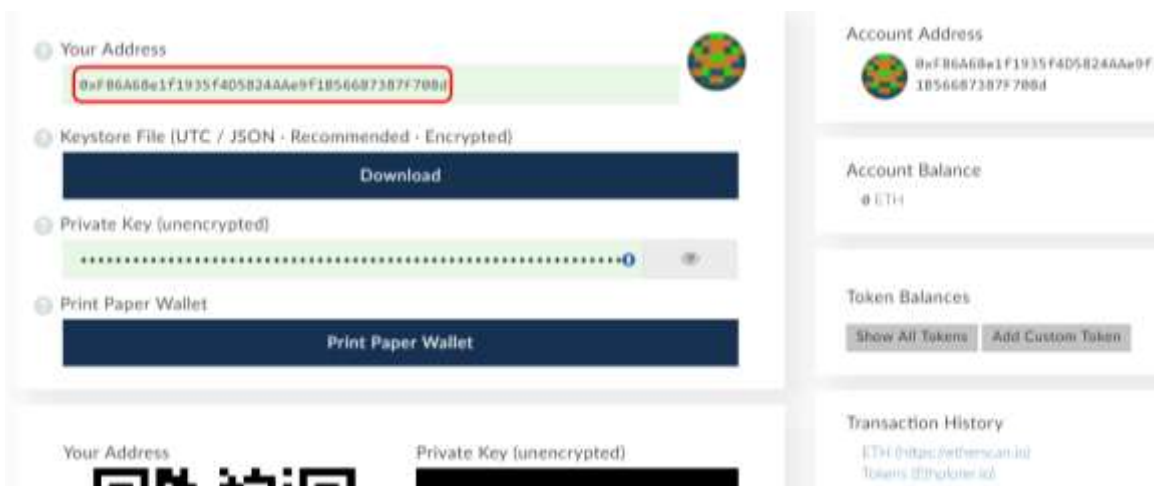

8. Upload your Keystore file.

9. Enter your password and click "Unlock"

10. Once your wallet is unlocked, you can scroll down to see all details.  
Including the wallet address which you'll need in order to send ETH from the exchange.

## Step 2 – Send Ethereum from exchange to your wallet

Once you established wallet – send Ether from Exchange created in **Step 0** or any other existing exchange to your wallet created in **Step 1**.

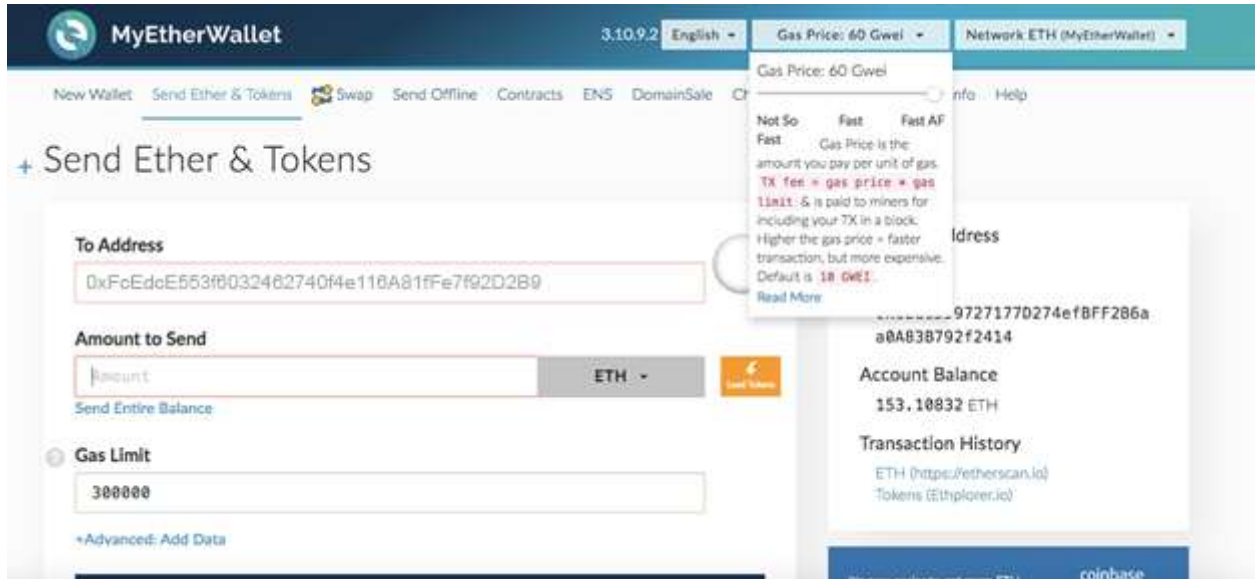

## Step 3 – Send Ethereum to StasyQ Token sale address

Having received ETH on your wallet <https://myetherwallet.com> , you can participate in StasyQ Token sale.

Choose “Send Ether & Tokens” in the menu. Unlock your wallet with the JSON file and your password or with Private key.

Enter the Token sale address seen on STASYQ.IO website and amount of the transfer.

**Set Gas Limit to 200000**

**Gwei to 60**

To make sure that transaction goes through even if Ethereum network slows down.

**Address for sending ETH will be published on the website <https://stasyq.io/> on the day of Token sale.**

## Step 4 – Adding SQOIN Token to your Wallet

Enter your wallet from where ETH was sent.

In case of MyEtherWallet – click **ADD CUSTOM TOKEN**

**Address:**

**0xF300cC72613D575A4567405C2A07d2AaF182aEBf**

**Token Symbol: SQOIN**

**Decimals: 18**
